VASHTI HARDY

## Write a story from the perspective of a personifate

At the Imperial Personifate Guild of Medlock, Craftsmen build personifates. These are machines that look like animals, but they hold the souls of humans who have died. In the space below, write a story from the perspective of a personifate. Remember, personifates have had no choice in coming back to life and they have no memory of their first life – not even their name.
